SUPPLY CHAIN MANAGEMENT COUNCIL

2022 Chair: Angela Westfield, Metal Flow

2022 Vice Chair: Eula Gaddis, Jireh Metal

Our vision is to be the Integrated Supply Chain Management hub enhancing the competitiveness of West Michigan companies. From that vision comes the council's mission to collaborate with top ISCM leaders to offer resources to area organizations and our members to achieve Supply Chain Management excellence.

The Supply Chain Management Council has established a strategic plan to achieve the following objectives:

- Provide a collaborative forum and networking opportunities leading to personal growth for Council members and area professionals.
- Leverage collective knowledge, capabilities, and ability to influence to enhance process performance and profitability of Council member companies.
- Play a lead role in advancing regional knowledge of the supply chain management with a focus on furthering economic development in West Michigan.

Membership in the Supply Chain Management Council provides an opportunity to create new collaborations with other supply chain professionals. As part of a trusted group of leaders, members are the voice of the supply chain in West Michigan, and they work to solve common challenges by providing actionable insights on new developments.

This Council provides these leaders a platform to discuss issues that are not unique to an individual business by offering best practice learning through:

- Facility Tours
- Discussion of current and leading trends
- Connections to educational institutional partners
- Production of the popular Supply Chain Management Conference and Commodity Trends Outlook events.

Through these activities, the council seeks to improve the processes and competitiveness of West Michigan manufacturers.

“Serving our profession, our community, our companies and our members.”
